

SAFETY RECALL

Stork Craft Manufacturing, Inc. Recalls Baby Cribs Due to Risk of Entrapment and Suffocation Hazard

The metal support brackets used to support the crib mattress and mattress board can crack and break. When one or more support brackets break, the mattress can collapse and create a dangerous gap between the mattress and crib rails, in which a child can become entrapped and suffocate.

All Cribs sold between May 2000 and November 2008

Customers should STOP using this product immediately and contact

Stork Craft

anytime to receive a FREE replacement kit with new mattress support brackets at:
